Lecture 5

1 Linked List

The file `linkedList.cxx` contains a simple implementation of so called "Linked List" data structure. Also it contains main body of the program where functionality of linked list implementation are tested. Some functions are not fully implemented and this is your task to finish them. All tasks/questions marked with TODO keyword in comments to the programm should be addressed. Make sure that all program printouts make sense and are correct on your opinion.

```
g++ -o test linkedList.cxx
./test
```
