

Homework 4b

- Request a personal certificate via the TCS portal exactly same way as we did during the tutorial, but using your own home or office computer
 - Do **not** log in to `pptest-iridium`
 - Any operating system will do, and you may want to try another browser on your computer, not necessarily Firefox
- To prove that you succeeded, send us:
 - 1. Your new certificate's Distinguished Name (DN)
 - 2. Validity/expiration time of your new certificate
 - A screenshot from the browser certificate store showing this information is also acceptable
