The ADC histogram displays two sharp, narrow peaks. The first peak is located at approximately 350 ADC units, and the second peak is at approximately 700 ADC units. The x-axis is labeled 'ADC value' and ranges from 200 to 1000 with major tick marks every 200 units. The y-axis represents frequency, with a maximum value of 1000 indicated by a horizontal line at the top of the plot area.
